EMERALDCOASTOPEN.COM

Thank you for your interest in becoming a sponsor of the Emerald Coast Open (ECO), the largest lionfish tournament in the world! You don't want to miss out! With the largest cash payouts, more gear prizes, and better competition, ECO attracts attention from professional and recreational divers, lionfish hunters, media, vendors, and the public. Each year, the Emerald Coast Open attracts hundreds of tournament participants, with over 7,500 spectators and attendees of the tournament and two-day festival. Tens of thousands of lionfish are removed, and media from across the country cover the event. With these numbers, ECO is by far the largest lionfish event in the world and is now comparable to prestigious fishing tournaments in the region.

The tournament has two components: the Pre-Tournament which runs from February 1 - May 12, 2021, and the Main Tournament on May 14-15, 2021. Fish count and the awards ceremony is May 16, 2021. The tournament is again being held in conjunction with Florida Fish and Wildlife Conservation Commission's (FWC) 7th annual statewide Lionfish Removal & Awareness Day (LRAD) festival. There will be a 2-day festival hosted by FWC to raise awareness of the lionfish invasion. There will be lots of activities for the public, including vendors, art, family friendly activities, lionfish tastings, live music, and amazing food. This event has been very well attended in the past with more than 7,500 individuals attending the 2-day event. An extensive national media campaign with digital, television, magazine, print, billboards, and social media advertising is planned for the festival and tournament again this year to increase those numbers even more.

The festival and tournament are being held at the world famous HarborWalk Village and AJ's Seafood and Oyster Bar in Destin, Florida. This venue has hosted large tournaments in conjunction with other events such as the Destin Fishing Rodeo and Destin Seafood Festival and ensures a significantly greater attendance due to its reputation, which will guarantee brand exposure to a large number of potential customers. As this event is during prime tourism season, you will also be able to publicize your message in front of an international audience as well as locals of northwest Florida.

The northwest Florida area has been identified as having the highest concentration of invasive lionfish in the world. In 2019, the event resulted in the removal of over 19,000 invasive lionfish. With the elite caliber of lionfish hunters being attracted to the area for this event as a result of the increased prizes, it is expected that the total number of lionfish removed during the tournament will continue to increase. This increased success will result in media exposure that will outlast the tournament weekend, increase ongoing exposure for sponsors, and generate traffic for future events.

Please review the following sponsorship package. If you have any questions, or would like to discuss additional sponsorship ideas, please contact us.
